Prostate Cancer: Pathology and Clinical aspects

April 3-4, 2009
Belgrade, Serbia

Welcome Message

Dear Colleagues,

If somebody made a history in European pathology education, it was Prof. Niki Agnantis with Ioannina University Courses in Pathology (IUCP). So, when we founded Serbian Division of IAP, and made our goal in local promotion of Pathology Courses, it was easy to copy something good and established, and to add a touch of local difference.

It is a great pleasure for me to welcome you in Belgrade for the first BEGUTECOP, Course in Prostate Cancer – Pathology and Clinical aspects. We are sure that the idea for making this educational Clinico-pathological Courses in Belgrade is of great importance.

For our residents, young pathologists and clinicians, and fore all others willing to improve in that field.

The participation of distrinquished tutors from abroad and Serbia, their experience and knoledge, and our determination to improve the level of pathology in Serbia, allowed us to realize this Course.

I would like to express my sincere thanks to all my friends, tutors at Prostate Cancer Course, for their help, decisive contribution, and vision of helping us in this project.

Finally,I wish you a fruitfull Course, and an enjoyable stay in Belgrade, designated by many as one „the most alive sities in Europe“.

Prof. Jovan D. Vasiljević, FRCPath
Director and Coordinator of BEGUTECOP

PROSTATE CANCER COURSE
