EScoP Courses in Pathology

EScoP Belgrade 2012

Selected topics in tumors of the kidney and urothelium

19 – 21, April , 2012

Belgrade, Serbia

Welcome Message

Belgrade, April 2012

Dear Colleagues,

It is a great pleasure for me to welcome you in Belgrade for the forth Course in pathology, a new „EScoP Belgrade 2012“. It will be dealing with clinical and pathological problems of the tumors of the kidney and urothelium, mainly upper urinary tract.

The idea came from my very good friend, Professor of Urology, Director of the Urological Clinic , Clinical Center of Serbia, dr Cane Tulić, who is also the vice-president of our Belgrade pathology Courses. The vice-presidents have sometimes good ideas, ... almost like presidents ?! I am joyking of course, and I would like to thank Prof. Tulić, not only for the proposing topics of our new Course, but for the organisation in many different aspects, including financial.

We are sure that the idea of organizing educational Clinico-pathological Courses in Belgrade is of great importance, mainly for our residents and young pathologists, but for our young clinicians too. It will demonstrate the importance and the challenge of better mutual collaboration.

The participation of distinguished tutors from abroad and Serbia, like always, their experience and knowledge, and our determination to improve the level of pathology in Serbia, but also in surrounding countries, has allowed us to realize this forth Course.

I would like to express again my sincere thanks to the tutors of this year Course, for their contribution in this project to support the development of pathology in South-East Europe.

Finally, again, I wish you a fruitful Course, and an enjoyable stay in Belgrade,

*Prof. dr Jovan D. Vasiljević, MCAP, FESC, FRCPath
Director of EScoP Belgrade 2012 Course*
